**Notice of Allowability**

1. Applicants' amendment after non-final filed November 8, 2006 is acknowledged.
2. Claims 9-11 & 17 are under consideration in this Office Action. Applicants' amendment and arguments filed November 8, 2006 were found to be persuasive, therefore all prior rejections under 35 U.S.C. 112 first and second paragraph rejections are hereby withdrawn.
3. The subject matter claimed in the instant application is also being claimed in copending application, serial number 11/294,087. However, the pending claims are not yet patented. Since the "provisional" **double patenting rejection in the instant application is the only rejection** remaining, the examiner has withdrawn this rejection and permitted the application to issue as a patent, thereby converting the "provisional" double patenting rejection in the other application(s) i.e. US Serial Number 11/294,087 into a double patenting rejection at the time the application issues as a patent.
4. This application is in condition for allowance except for the presence of claims 1-8 & 12-16 directed to non-elected inventions without traverse. Accordingly, claims 1-8 & 12-16 have been cancelled.
5. Claims 9-11 & 17 are allowed.
6. The following is an examiner's statement of reasons for allowance:

This Application provides a process for reducing the viscosity of a material comprising a mucin or a glycosylated polypeptide by contacting the material with a viscosity reducing effective amount of a polypeptide which is at least 95%

7. Drawings filed 2/25/04 is acknowledged.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
